

EMEA Rugged Accessories Guide

Latitude 7220 Rugged Extreme Tablet Latitude 7220EX Rugged Extreme ATEX Tablet

Purpose-built ecosystem: Latitude 7220 Rugged Extreme Tablet

The Latitude 12 Rugged Extreme Tablet can be customized to meet your unique needs from the field to the office.

Mobility accessories

Carry the Rugged Tablet easily with available handles, straps and carry cases.

Keyboard Cover

Add an RGB backlight IP-65 keyboard for productivity on-the-go (comes with kickstand).

Active stylus*

Get the most input responsiveness with an IP65 certified active stylus.

Modular expansion

Expand functionality with an Extended I/O Module (2x USB 3.0 ports + Ethernet) as well as barcode and magnetic stripe reader options

Kickstand

Keep your tablet upright for easy viewing at the desk.

Rugged Tablet Vehicle Dock

Mount securely and ergonomically in vehicles

Rugged Tablet Desk Dock

Maximize productivity by adding connectivity and battery charging at the office.

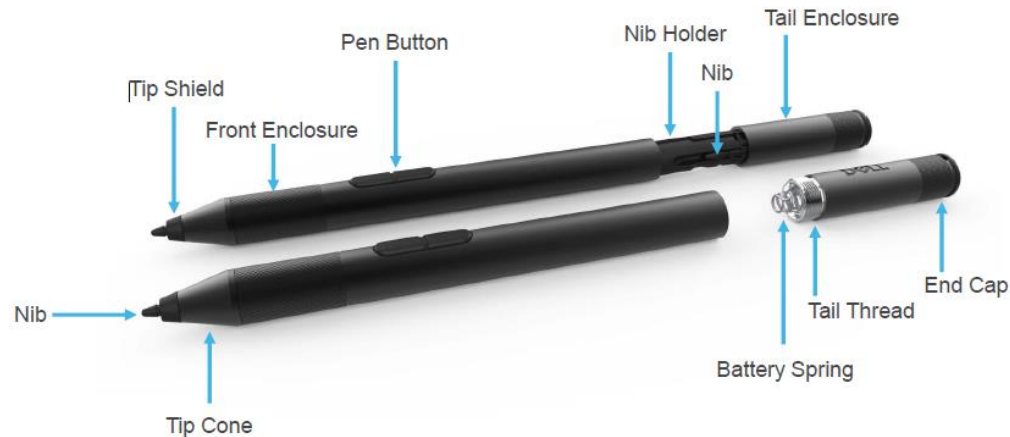

Dell Rugged Active Pen – PN720R

What: A rugged active pen that lets you write and draw on Latitude Rugged tablets utilizing MPP technology

Why: To provide customers with an active pen that can withstand the same extreme environments that their Latitude Rugged tablet is certified to work in

SMCI: Get a responsive writing and drawing experience on your Latitude Rugged tablet, even in the world's harshest environments

Compatibility: Rugged 7220 and 7220EX, not backwards compatible

Product Highlights:

Write and draw naturally on your Latitude Rugged tablet

- Pressure-sensitive responsiveness provides a pen-on-paper like experience on your Latitude Rugged tablet

Enhance your productivity, even in extreme environments

- IP-65 rating on your rugged active pen allows you to work with your tablet, even when there is dust, dirt, water, fog
- Store 4 replacement nibs in the cap of your rugged active pen for a worry-free field experience replacements nibs available in packages of 5, sold separately
- Easily select, copy, and move objects on your Latitude Rugged tablet with simple button-clicks on your active pen

Power: Automotive batteries supply 12 Volts DC – also written 12V DC (like what you get from the cigarette lighter socket) , this needs to be converted from 12V to 19VDC (The PC input Voltage) via DC to DC convertor (it converts 12V to 19V). Now the challenge is some vehicles have 24 VDC or 48 VDC – so converter needs to change 48 or 24 VDC into 19VDC.

Power Supplies: There are 3 main types, internal, external and isolated. Some forklift trucks are battery powered, when the fork lift truck is being used the voltage supply to the PC can be unstable, in order to prevent any damage please use the isolated version – please read the separate guide to power.

External Antennas: If a good Wi-Fi, 3/4G or GPS signal is required it is advisable when mounted in any vehicle to use external antennas - they are fixed outside the vehicle and greatly improve the signal strength.

Port Replication: Allows for the ports on the edges/sides of the PC to be replicated via a single common connector on the bottom or back of the PC. It's the same as desk port replicators/docking stations.

Rugged Power Solutions from Lind

Fully Rugged Standard

Epoxy potted and housed in an ABS case for durability, and sealed to protect the adapter from moisture and high humidity, these adapters are designed to power your Dell device from your vehicle. They are equipped with many safety and technical features to ensure the highest level of performance and safe operation when charging your Dell device. Available for 12-16 or 12-32 Vdc power sources.

- **Output Power:** Up to 90 watts
- **Operating Temperature:** -20 to +40 °C
- **Storage Temperature:** -40 to +85 °C
- **Weight:** 375 g (excluding cables)
- **Dimensions:** 135 x 75 x 25 mm (excluding cables)
- **Cables:** detachable (field-replaceable)

Rugged Power Solutions from Lind

Fully Rugged Forklift

These adapters are especially designed for forklift and railway applications. The electrical isolation between input and output prevents ground loops, and also filters voltage spikes or power surges occurring on the input voltage line, thus eliminating potential damage to the adapter itself and to your Dell device. Available for 12-32Vdc, 20-60Vdc and 70-110Vdc power sources.

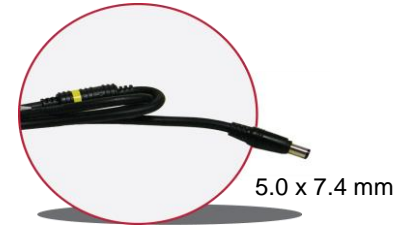

- **Output Power:** Up to 100 watts
- **Operating Temperature:** -20 to +40 °C
- **Storage Temperature:** -40 to +85 °C
- **Weight:** 415 g (excluding cables)
- **Dimensions:** 150 x 75 x 30 mm (excluding cables)
- **Mounting Hole Size:** 5.0 mm

Rugged Power Solutions from Lind

Semi Rugged All-In-One

This All-In-One AC/DC & DC/DC Combo adapter enables you to power your Dell device wherever life takes you – at the office, on the road or in the air. Through the integrated USB socket, you can simultaneously power your mobile phone, MP3 player, digital camera and other USB devices.

- **Output Power:** Up to 90 watts
- **Input Voltage AC:** 100-240Vac (50-60Hz at 2.5 amps)
- **Input Voltage DC:** 12–16 Vdc
- **USB Port:** 5Vdc / 0.6A
- **Weight:** 320 g (excluding cables)
- **Dimensions:** 145 x 75 x 25 mm (excluding cables)

Multi-Bay Battery Charger

Keep your Dell Latitude Rugged Batteries fully charged with the Lind Modular Multi Bay Charger. Charge up to 16 batteries per charger with interchangeable battery bays for the Dell Latitude Rugged line of notebook and tablet computers. Lind battery chargers incorporate the highest degree of circuit protection to ensure your Dell batteries are charged properly.

Simultaneously charge Dell batteries for the 5420, 5424 and 7424 Dell Latitude Rugged Notebooks and 7202, 7212 and 7220 Tablets

Features:

- **LED Light Indicator:** Green / Yellow / Red
- **Temperature Range:** 0°C to 40°C
NOTE: Charging outside of temp range may result in temporary stoppage of charging.
- **Input Power:** 19.5VDC (200W max draw) from a Dell Power Adapter
- **Input Power Connector:** 3.0x4.5mm (Mini-Bondi) or 5.0x7.4mm (Bondi)
- **Agency Approval:** IEC 60950-1, CB
- **Mil-Standards:** tested to MIL-STD-810G certification

Rugged Power Solutions from Lind

Multi-Bay Battery Charger | Master Controller

- **This is powered by a single Dell compatible AC Power Adapter**
 - The wattage of the AC Adapter can range from 45 to 330 watts and will determine how many batteries are charged simultaneously.
 - The higher the wattage of the AC Adapter, the higher the number of batteries being charged, lowering the overall charge time.
 - The power adapter shipped with the Dell Latitude Rugged Notebook or Tablet may be used with the charging system.
 - When charging four batteries or more, a 240W adapter is recommended for optimal charging times.
 - Higher wattage AC Adapters will charge more bays simultaneously than the lower wattage AC Adapters.
- **Allow users to daisy-chain multiple chargers to enable simultaneous charging of multiple batteries up to 16 per Master Controller**
 - Functional limit of 16 batteries to be connected to a single Master Controller
 - Any combination of bays (up to 16) may be used within the same charging system.

Lind Part # DECHMC-5021

Rugged Power Solutions from Lind

Multi-Bay Battery Charger | Charging Bays

The Lind **5420**, **5424** and **7424** Charging Bays (DECHCB-5022 / **AA560080**) work in conjunction with

- the Lind Master Controller (DECHMC-5021 / **AA560079**) and
- a Dell AC Power Adapter.

The Lind **7202**, **7212** and **7220** Charging Bays (DECHCB-5023 / **AA560081**) work in conjunction with

- the Lind Master Controller (DECHMC-5021 / **AA560079**) and
- a Dell AC Power Adapter.

The size of the Dell power adapter will determine how many bays may charge at the same time. When charging four batteries or more, a 240W AC/DC adapter is recommended for optimal charging times.

Charging time is estimated to be 8 hours for 16 bays with a 240W AC/DC adapter.

Lind Charging Bays (DECHCB-5022 and DECHCB-5023), Lind Master Controller (DECHMC-5021) and Dell AC/DC adapter are sold separately
